In this sense, Putin’s Russia has developed a double strategy. It neither laboriously negotiates its way into the Western constitutional order, nor does it make obeisance to the status quo. Instead, it remains at the margins of the international community, pursuing its goals in an autarkic way. Putin’s Russia is an autarkic power. But how far can it pursue this strategy?

Young people protesting against the elites, as “Generation Solidarity,” have created a local implosion of state institutions. But this movement is not a political one. It is more of a social protest. Young people are protesting against the state, not against the political system. They are not trying to change the system, but they are trying to change the state. They want to create a new state, not a new political system.

Soviet Russia was a “leader” of the “third world.” For years, the US has been trying to create a counterbalance to the Soviet Union. But the US was not successful. It was not able to create a counterbalance. The US was not able to create a counterbalance. It was not able to create a counterbalance. It was not able to create a counterbalance. It was not able to create a counterbalance.

Now, the new Russia, under Putin, is returning to the principles of Western civilization. It is returning to the principles of Western civilization. It is returning to the principles of Western civilization. It is returning to the principles of Western civilization. It is returning to the principles of Western civilization.

This is how Russia is establishing itself as an “indispensable” nation.

It has been an astonishing success story, from the Cold War era and the collapse of Yalta, on the one hand, and from the US-dominated “liberal order,” on the other. The US and its allies are now confronted with a new challenge. The US and its allies are now confronted with a new challenge. The US and its allies are now confronted with a new challenge. The US and its allies are now confronted with a new challenge.

Perhaps a new term for “dissolution,” a word that comes from the Greek meaning “to dissolve,” is needed.
